[Last week](#) we asked a rhetorical question if you *knew* what would happen in the future, what changes would you make in your behaviour, lifestyle, activism, etc., if any. As a follow up, please share (briefly) what you are doing to adapt or mitigate the economic/energy/environmental changes on the horizon. If you are doing nothing, please share the reason(s) why. (There are no right answers, or at least not ones we will know are right until well into the future).
